DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-40 are rejected under 35 U.S.C. 102(b) as being fully met by Kinman (USP 5834999).

Kinman discloses a transducer for a stringed musical instrument (see Figs. 2,3) comprising a first (string-sensing) coil and a second (noise-sensing) coil comprising a permanent magnetic pole piece which reads on a ferrite material core (Col. 2 lines 22-37). Regarding Claim 31, see col. 2 lines 3-36.

With regard to Applicant's arguments about the recited "eddy current losses," while Kinman does not explicitly use this language, Kinman states in the Background that the invention is directed towards "adequate noise cancellation" and that "the embodiments of the transducer of Figs. 1 to 6 function to not only reduce noise or hum ..." and the Examiner submits that this noise reduction of Kinman reads on that recited in the claim language.

Claims 17-40 are rejected under 35 U.S.C. 102(b) as being fully met by Blucher (USP 5530199).

Blucher discloses an electromagnetic pickup (Fig. 1). Regarding Claim 31, see col. 3 lines 47-55. With regard to Applicant's arguments, Claim 17 is fully met by Blucher in that the secondary bobbin 20 has a ferromagnetic core (Col. 3 line 36), and that reads on a core comprising a ferrite material. The arguments regarding the "eddy currents" above with respect to Kinman apply similarly to Blucher.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
